## ABOUT ME

I am a highly organized and hard-working individual looking for a challenging role in a reputable organization to utilize my technical, database, and management skills for the growth of the organization as well as to enhance my knowledge of new and emerging trends In an IT organization.

---

## WORK EXPERIENCE

- **Full Time Freelancer** Feb 2021 – Present  
I am working as a Developer and playing with python to bring some new to the market.

---

## BEST PROJECTS UNDERTAKEN SO FAR...

- **Third umpire decision review system:**  
This project is based upon the TKinter module of the python programming. This technology is used in the world cup IPL and international test cricket with the help of this project third umpire takes the decision of noble run out a catch out after execution this program this shows the final decision of the third umpire that the batsmen is out or not out.
- **Indian railway announcement system project**  
In this project I am using a bunch of modules like Pyaudio, pydub, Ffmpeg, the bunch of the modules to process the audio and get the announcement job thousands of the train done efficiently and take the data from the Excel sheet.
- **Locating states | Python GUI and Backend**  
This project is led by me individually based on TKinter library of python programming. This project/program basically focuses to give the top three popular districts of the state that are showing in the scroll bar. After execution of the program, it opens a interactive page where we can search the state as per mentioned there.
